

An efficient irrigation system can save you money – let us check yours is working properly!

Efficient irrigation water delivers multiple benefits

Ensuring your irrigation system is performing as expected delivers many benefits:

- Reduced water use
- Improved crop production
- Reduced 'wear and tear' on equipment
- Reduced energy costs.

We can help you improve your irrigation efficiency

IrrigationNZ is carrying out irrigation efficiency system checks on farms between the Rangitata and Waitaki Rivers until mid February 2019. This programme offers irrigating farmers:

- Robust testing of your irrigation system
- Independent expertise to help interpret the results
- Advice with how to improve your irrigation management to save costs and improve productivity.

Find out more and register

This is being carried out for a limited time and the testing cost is being subsidised by a number of partner organisations. Register soon to avoid missing out!
