

GIVE YOUR **EFFLUENT SYSTEM** A SHAKE UP

RAINER EFFLUENT VIBRA SCREEN

The Rainer Effluent Vibra Screen removes solids to > 1mm

The Rainer Vibra Screen successfully separates solids from liquids in dairy farm effluent creating a low input waste management solution.

The Vibra Screen removes solids larger than 1mm. This unlocks the potential in existing irrigation infrastructure and opens the way for new technology capable of streamlining your operation, easing the burden of regulatory requirements.

FEATURES:

- ▶ Centre pivot injection and VRI compatible
- ▶ Solids separated to >1mm
- ▶ Low maintenance with minimal moving parts
- ▶ 20+ sold with proven results
- ▶ Cost efficient
- ▶ 2 models available to suit all budgets and operation size
- ▶ Recycle water for washdown
- ▶ Accurately protect waterways and other obstacles from effluent contamination when used in conjunction with VRI

INDICATIVE FLOW RATES

| | | | | | |
|--------|---------------------|----------|-------|---------------------|----------|
| VS1200 | Feed pad waste | 6 L/s | VS600 | | |
| | Normal' dairy waste | 9-15 L/s | | Normal' dairy waste | 4-11 L/s |
| | No. of cows | 600 + | | No. of cows | < 500 |

"We are very happy with the screen, its handling cowshed and feed pad effluent, it's doing its job"

Bryan Beeston - Tribrit Ltd, Ashburton

IF ANYONE CAN MAKE IT RAIN, **RAINER CAN.**
