

4 HRS IN-CLASS

FOUNDATION PASSPORT – CIVIL (IRRIGATION)

This four-hour course is designed to ensure everyone onsite understands their health and safety responsibilities. This is a new foundation-level course offered by Site Safe with targeted content for the irrigation sector.

Who should attend this course?

Workers in the New Zealand irrigation sector, young workers and apprentices, secondary school students looking to enter the irrigation sector, workers who have shifted careers into the irrigation sector, or migrant workers who may or may not have international irrigation work experience.

The Foundation Passport - Civil (Irrigation) introduces learners to:

- › Vital topics such as how to keep themselves health and safe.
- › Identifying hazards and risks, and how to apply the appropriate controls.
- › Understanding their legal responsibilities.
- › Promoting good mental health.

Course content:

- › Why is health and safety important?
- › Workers' part in health and safety
- › Getting ready to work:
 - › Being physically and mentally fit for work

- › Know the site:
 - › Site induction
 - › Site culture
 - › What a healthy and safe work environment looks like
 - › Technical terms and jargon used onsite
- › Know the law:
 - › Fundamental topics about HSWA: what it is, and the roles and responsibilities of workers and employers (PCBU)
- › How can workers be harmed?
 - › Identifying common hazards and critical risks in an irrigation environment
- › What can workers do about it?
 - › Identifying common controls that are used in an irrigation environment.

Course format

- › Competitive team quiz
- › Discussions
- › Videos
- › Puzzles and games
